

SPECIAL ISSUE REQUIREMENTS FOR AUTHORS

Mathematical and Computer Modelling

In order to continue the publication of professional quality special issues in our journal, the items listed below are the minimum requirements for accepting manuscripts for Special Issues submitted for publication in *Computers and Mathematics with Applications*. We ask you to be sure that your manuscript meets these requirements when it is submitted to us. We will be unable to proceed with the publication of the special issue until these requirements are met. We suggest that you use the following as a checklist before forwarding the final version of your article to the guest editor.

_____ **Addresses:** Please make sure your manuscript has current and complete mailing and email addresses for all authors and co-authors. Also, please keep us updated on any address changes.

_____ **Electronic Versions:** Either a T_EX, AMS- T_EX, L^AT_EX, or Word file for the text of the manuscript is necessary along with a pdf file of the final version of the article. The digital file (T_EX or Word file) must match the pdf file exactly. Any discrepancies detected between the two files will cause delays in the publication of the special issue.

_____ **Abstracts:** Your manuscript must contain an abstract.

_____ **Keywords:** Five keywords should be provided for your manuscript.

_____ **Figures & Graphs:** An electronic version of each figure is required. Each figure or graph should also appear in the pdf file of your manuscript.

The preferred format for figures and graphs is PostScript (ps) or encapsulated PostScript (eps). From with the T_EX file of each paper, we import the eps figures. We will try to work with any electronic format that we receive. However, this may cause a delay, and at our discretion, we may require authors to re-submit the illustrations in ps or eps format, compatible with Adobe Illustrator. Each figure or graph should be a separate file.

_____ **References:** References should be numbered sequentially in the order of their appearance in the text, not alphabetically. References should be cited in the text in square brackets. If the references in your manuscript are not in this format, you will be asked to redo them, causing a publication delay for the entire special issue.

Meeting these minimum standards will ensure better quality and faster publication of the Special Issue. We appreciate your cooperation.

E.Y. Rodin
Editor-In-Chief
