

Call for Papers

The 2009 IEEE International Workshop on Advanced Computing on Service and Supply Chain Management (ACSSCM 2009)

In conjunction with ACCS 2009, Sanya, Hainan Island, China

<http://www.gip.hk/cso2009/accs2009>

MOTIVATION AND PURPOSE OF THIS WORKSHOP

Service Management is a growing multi-disciplinary research and academic effort that integrates aspects of established fields like computer science, operations research, engineering, management sciences, business strategy, social and cognitive sciences, and legal sciences.

Global markets are increasingly service-based economies. Employment growth will be concentrated in the service-providing sectors of the global economy. Service innovation is needed to maintain profits.

Service design, development, marketing and delivery all require methods to make service businesses more efficient and scalable. Practitioners need depth and breadth in combinations of technology, business, and organizational studies.

Advanced Computing plays an important role for supporting the business analysis, decision making and strategy formatting in Service and Supply Chain management.

TOPICS

The international Workshop on Advanced Computing on Service and Supply Chain Management invites submissions previously unpublished papers on ACSSCM issues. The workshop will focus on, but not limited to, the following themes:

- Service resource allocation
- Service process reengineering
- Service network design
- Information sharing in supply chain coordination
- Data mining techniques for service management
- Models and algorithms for revenue management
- Robust optimization for service and supply chain management
- Stochastic approximations for service and supply chain management
- Meta-heuristics for large scale management problems

SUBMISSIONS:

Original Papers are invited from prospective authors with interest on the related areas. All the submitted papers should be written in English, using the [IEEE-two column template](#), including all tables, figures, and references. All papers must be submitted electronically in WORD or PDF format and be mailed to shiningchina08@gmail.com.

All accepted workshop papers will be included in [IEEE Computer Society Proceedings](#) if they have paid for registration fee, which will be indexed by [EI Compendex and ISTP](#). Furthermore, the workshop organizers can recommend the extended versions of some selected high-quality workshop papers to the following international journals.

[Computing and Informatics \(SCI-indexed\)](#)
[Journal of Computer and System Sciences \(SCI-indexed\)](#)
[Optimization \(SCI-indexed\)](#)

IMPORTANT DATES:

Deadline for paper submission -----

November 20, 2008

Notification of acceptance -----

December 10, 2008

Deadline for camera-ready manuscript submission -----

January 1, 2009

WORKSHOP ORGANIZERS:

Dr. Shi Ning (shiningchina08@gmail.com)

Prof. Wang Fan (fanwang@gmail.com)
